

News Release

March 1, 2009

Cyber Technologies has been selected as a Preferred Vendor for the Arizona Hospital and Healthcare Association (AzHHA).

Cyber Technologies will be offering a series of cost effective complimentary solutions that solve major information security vulnerabilities for the hospital membership. When implemented, hospital members will be able to demonstrate greater HIPPA compliance resulting in reduced liability and costly data breach exposure of patient information.

Cyber Technologies Computrace service, by Absolute Software will enable hospitals to more effectively manage computers and Blackberry devices for regulatory compliance and reduced operational costs. Computrace will track hospital computers regardless of their location, physically recover lost or stolen computers and remotely delete sensitive hospital information. Computrace will also assist in regularly auditing computers and their status as well ensuring the complete removal of information from computers at lease-end or retirement. With Computrace in place, hospital members will provide the highest level of protection for their computers and the sensitive information on them.

Additionally, Cyber Technologies will be offering a robust email encryption service by ZixCorp to the membership. This service is being used by over 1,000 hospitals and will enable members to securely communicate with patients, health plan providers, testing facilities, pharmacies, vendors, and outsourcing providers without major overhauls to their IT departments. BlueCross/BlueShield of Arizona and half the BlueCross, Cigna, Humana, and Wellpoint health plan providers are securely communicating with hospitals nationwide using this service. As an additional benefit, Arizona hospitals that sign up for the service can send and receive encrypted email without having to go through a cumbersome password unencrypted step. Hospital members will achieve greater HIPPA compliance while protecting patient information at the highest level.

About Cyber Technologies

Cyber Technologies solutions reduce hospital costs and liability by ensuring hospital's vital information is protected through the highest level of data encryption, endpoint security and device tracking technology. The company's solutions solve information security vulnerabilities in healthcare, financial, corporate, education, and legal environments.
